

## Speaking from Experience *Huntington's Disease*

### **Transcript for chapter 1 of 10: Life before Huntington's**

**Graeme (has Huntington's) and Katherine** - I didn't know much about it and I was a bit naive about being sick. I'd lead a pretty healthy and active lifestyle. I'd been a runner and football umpire, field umpire, for 30 years. Then I joined the fire brigade and I carried that on, with running. I was lucky that I wasn't sick. Then when I got Huntington's, it sort of changed things a bit.

**Karen** - When I was younger, I was interested in sports and things like that and doing lots of different things. I'm an outdoors person, so I've always enjoyed going camping and things like that.

**Graham (has Huntington's) and Jan** - I was a maintenance technician and was involved with communications and provisions of telephones and maintenance of level crossing pedestrian equipment as well.

**Paul and Marion (has Huntington's)** - She was always on the ball and always active.
